MM INTELLIGENCE

MM INTELLIGENCE, LLC · MONTGOMERY, ALABAMA

Capability Statement

We are a small business in Montgomery, Alabama that builds AI voice agents, AI assistants, automation and custom software, and trains the people who use them. We work in English and Arabic, and the same team builds, ships and supports every system.

CORE COMPETENCIES

- **AI voice agents.** Phone agents that answer, route and place calls in English and Arabic, with handoff to staff and call records for review.
- **AI assistants on your own data.** Plain-language question and answer over documents, records and open data, with sources shown for every answer.
- **Local AI.** Language models that run on your own hardware, including networks with no internet connection, so data never leaves the building.
- **Workflow automation.** Intake, scheduling, document handling and reporting that runs without retyping between systems.
- **Custom software.** Web and mobile applications, dashboards and data pipelines, built and supported by the same team.
- **AI training for staff.** Hands-on workshops where each person leaves with something working, from a two-hour session to a full day.

PAST PERFORMANCE

- **Faulkner Industrial.** Field job scheduling and tracking system for office staff and field crews. Several projects.
- **Landmarks Foundation, Old Alabama Town.** Self-guided tour app using beacons, installed without altering historic buildings.
- **Gulf telecom operator, Bahrain.** AI agent placing outbound collections calls in Arabic and English.
- **Bridgepoint Advisory Group.** AI receptionist answering calls and messages, including the number port.

PRODUCTS WE BUILT AND RUN

- **Mango.** AI front desk that answers business calls, books appointments and texts a summary of every call. mangoanswers.com
- **AskMGM.** Free civic tool. Ask a question about Montgomery in plain English and get an answer from the City's own open data. askmgm.com
- **WhatsGoodMGM.** A weekly curated guide to Montgomery events, on a map. Anyone can submit an event. whatsgoodmgm.com
- **U.S. Census Analysis.** Pulls live data from the U.S. Census API for any ZIP code or census tract: age, race, income, poverty, education and housing. uscensus.streamlit.app

TRAINING AND WORKSHOPS

15 public sessions since 2025, for small business owners, seniors, students and staff. Hosts and partners include **AARP Alabama**, **SBOSS**, **Urban League of Alabama** and **Auburn University at Montgomery**. Our SBOSS sessions were presented with the City of Montgomery.
