// WHO_WE_ARE

Built to work, and *human by design.*

An AI-native software company building well designed solutions for businesses and professionals. Our work spans AI systems, automations, agentic platforms, and web and mobile apps.

Our philosophy

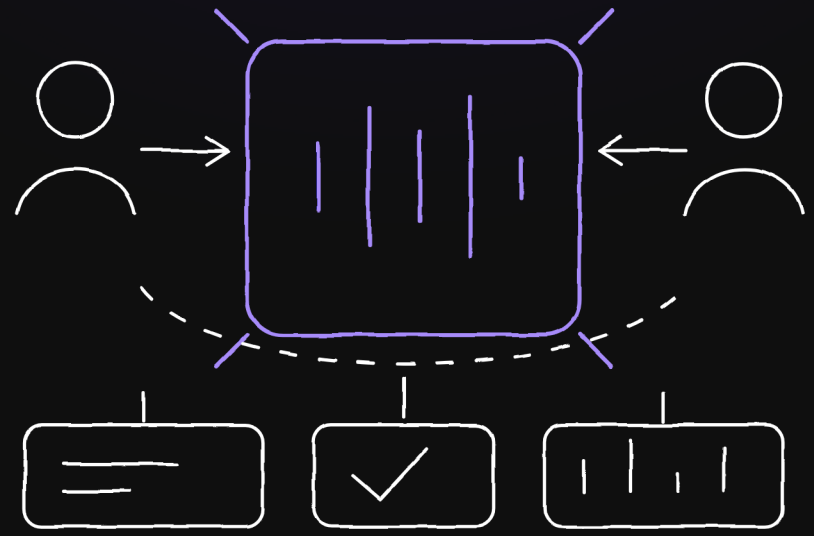
Build useful, well designed AI, tailored to what a client actually needs.

Humanity in the loop

AI that behaves sensibly, respects the people whose work it learns from, and teaches the people who use it.

Our goal

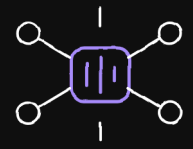
Reliable, compliant AI that passes audits and holds up long after launch.



// WHAT_WE_DO

What we *build.*

Working software every week. First prototype in two weeks, production in roughly eight.



SYS_01

AI systems and agents

Agents grounded in your data that act inside the tools you run, including voice agents that answer and place calls, multilingual by default.

SYS_02

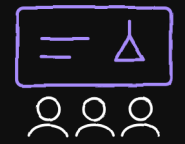
Web and mobile apps

Full-stack web platforms and native iOS apps, designed and shipped by one team.

SYS_03

Automations

Repetitive work across your systems, handled end to end without a person in the loop.



SYS_04

Workshops

Hands-on training for teams, owners, and faculty. Everyone leaves having built something.

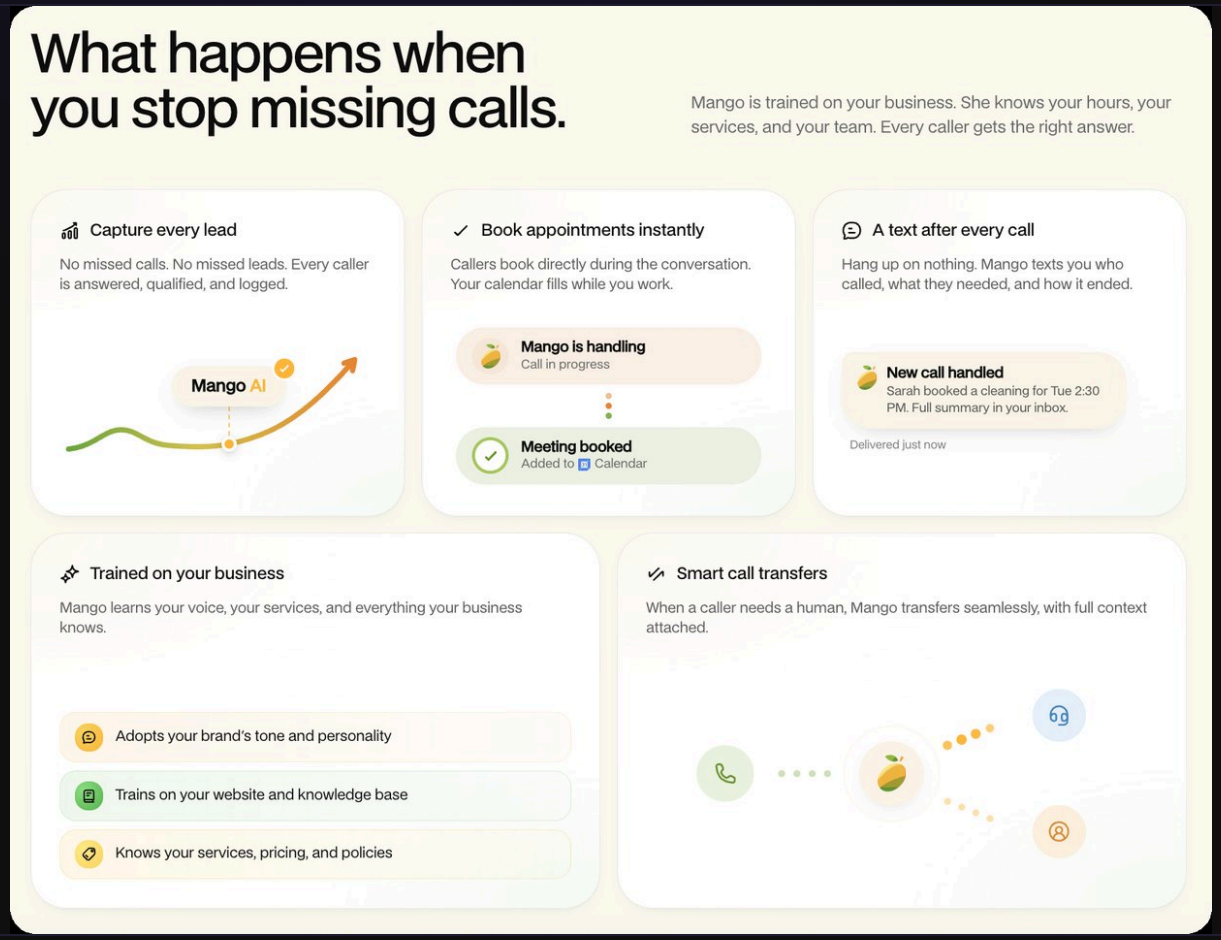
Mango

Answer every call without picking up the phone.

An AI receptionist for businesses where the phone drives the day. Trained on your hours, services, and team. She answers in a natural voice, books during the conversation, and texts you a summary after every call.

- Books onto Google Calendar, Outlook, or Calendly
- Connects to HubSpot, Salesforce, Jobber, Zapier
- Every call and customer detail stays private and secure
- Live the same day, on your existing number

Property management | Non-profits | Dental | Law



// OUR_PRODUCTS · 02

We build our own *products too.*

Real products with real users, built and maintained by the same engineers who will take on your project.

PRD_02 · CIVIC AI

AskMGM

An AI for Montgomery. Ask any city related question and AskMGM answers it from the open data portal the city publishes. Free, no login, no data collected.

askmgm.com

Ask Montgomery

PRD_03 · IOS FITNESS

MateMove

A free all-in-one fitness app that tracks workouts, nutrition, and steps, with an AI food scanner built in. Completely free, no ads, no paywalls.

Apple App Store

PRD_04 · LOCAL GUIDE

WhatsGoodMGM

A weekly curated guide to Montgomery events, with a map and open submissions. Made in Montgomery, for Montgomery. No ads, no algorithm, just what's good.

whatsgoodmgm.com

What's Good.MGM

PRD_05 · STUDY APP

BrainBuff

Drop in a PDF, lecture slides, or a YouTube video. BrainBuff turns it into flashcards, quizzes, and boss battles. Spaced repetition underneath, XP and streaks on top.

brainbuff.app

// TRAINING_&_WORKSHOPS

AI without the *overwhelm.*

Nobody leaves with a slide deck. Everyone leaves having built something with AI they will use the next day.

WHERE_WE_HAVE_TAUGHT

- **Auburn University · 100+ faculty and staff trained**
- **Alabama State University · building AI agents, hands-on**
- **Alabama State University AI Day · featured talk**
- **SBOSS Montgomery · business owner workshop series**
- **Montgomery.AI · custom agents with no code**
- **Fusion supply chain conference · panelist**
- **HBCU app development students · mentorship**

2-hour sessions | Half-day team training | Monthly series | In person or virtual | Participant workbook

// WHAT_PARTNERS_SAY

Don't take our *word for it.*

"

MM Intelligence has simplified our experience and communication efforts through multiple projects. The team brings insight, up to date experience, and superb communication skills to the process. We look forward to working long term with MMI.

Wade Faulkner
PRESIDENT, FAULKNER INDUSTRIAL

"

MM Intelligence made our interpretative beacon installation at Old Alabama Town such a rewarding experience. They took genuine care to understand our site and our our visitors, offering thoughtful guidance every step of the way. We wholeheartedly recommend them to any historic site looking to bring their story to life.

// LET'S_BUILD

Tell us the problem. We'll show you working AI *in weeks.*

01

A 30-minute call

You describe the workflow. We tell you if AI is the right answer.

02

A scope with numbers

Where the time goes today, what it costs, what changes.

03

Something working

A prototype you can test, usually inside two weeks.
